(LEED) Verification Letter  
Leadership in Engineering and Environmental Design

To Whom It May Concern,

Tyler Union is a subsidiary of McWane Inc. with manufacturing facilities located in Anniston, Alabama Tyler, Texas, and Guozhuang, China. Tyler Xian Xian is owned and operated by Tyler Union. All of these facilities manufacture ductile iron waterworks fittings conforming to the requirements of ANSI/AWWA C153/A21.53, ANSI/AWWA C111/A21.11, ANSI/AWWA C104/A21.4, and ANSI/AWWA C110/A21.10. Current revisions apply for each noted standard. The physical address of each manufacturing facility is provided.

Tyler Union Foundry Company 1501 West 17<sup>th</sup> Street Anniston, Alabama 36201

Tyler Union 11910 CR 492 Tyler, Texas 75706

Tyler Xian Xian Foundry Company LTD, Guozhuang Town, Xian County, 062255, Hebei China

The percentage of post-consumer recycled scrap iron used in the manufacture of Tyler Union domestic ductile iron fittings and cast iron municipal valve boxes is 100%. Scrap vendors must meet our "ISO 9001 approved supplier" requirements. The percentage of post-consumer scrap iron used in the manufacture of Tyler Xian Xian ductile iron fittings is 15% with the remaining percentage being Pig iron.

Per our ISO 9001 procedures, only approved suppliers can provide scrap metal to our plants. Utilizing Radiation detectors Tyler Union and Tyler Xian Xian manufacturing facilities monitor all incoming scrap metal deliveries insuring they are radiation free. Tyler Union Waterworks Domestic fitting production processes utilize recycled scrap metal from the locations listed. Upon request Tyler Union will provide the locations in China where recycled scrap metal is received for Non-Domestic Waterworks fitting production.

<u>Columbus,GA</u>	<u>Alexander City,AL</u>	<u>Attalla,AL</u>	<u>Verbena,AL</u>
<u>East Point,GA</u>	<u>Alexandria,AL</u>	<u>Decatur,AL</u>	
<u>Lawrenceville,GA</u>	<u>Anniston,AL</u>	<u>Oxford,AL</u>	

Recycled scrap is inspected in accordance with environmental law (MACT) to ensure it is free of lead, mercury, and other contaminants. Should a non-conformance be identified on any incoming scrap or recycled metal the load or the contaminated contents of the load are rejected per ISO 9001 guidelines. The Scrap Metal Supplier, Receiving Plant Purchasing Manager, and Receiving Plant Quality System Manager are notified. Records of these events are maintained and reviewed per our ISO 9001 requirements.
